AI / Gen AI: AI API Integration, Prompt Engineering, LLM Integration (Groq Llama 3.1)

Tools: Git, GitHub, Nodemailer, Stripe API, EmailJS

PROFESSIONAL EXPERIENCE

Integral Web Solution – Full Stack Developer **Nov 2025 – Present**

Virar (W)

- Developed and deployed multiple full-stack production applications using React.js, Next.js, Node.js, and Express.js.
- Built and deployed client websites including corporate platforms, portals, and e-commerce systems.
- Integrated third-party services including Stripe payments, EmailJS, Nodemailer, and AI APIs.
- Configured Linux VPS servers (Contabo) with Apache Virtual Hosts and Reverse Proxy routing for multiple live domains.
- Managed business email setup using **Google Workspace**, **Microsoft Services** including domain-based email creation, user account provisioning, Gmail configuration, and client email administration.
- Managed **domain and DNS records**, mail server configuration, and migrated existing webmail data to newly provisioned Google Workspace accounts while maintaining email continuity.
- Implemented Technical SEO strategies including React Helmet, schema markup, XML sitemaps, and Open Graph optimization.
- Performed SEO optimization for **20+ websites**, including keyword research, content optimization, and backlink strategies to improve search rankings.
- Successfully contributed to ranking websites in **US search regions and all middle east countries search regions**, improving visibility and organic traffic.
- Deployed ERPNext v15 on Ubuntu with MariaDB, Redis, Supervisor, and Nginx configuration.
- Diagnosed and resolved production issues including SSL conflicts, 403 errors, and server misconfigurations.
- Built secure backend services and automated email workflows using Node.js and Nodemailer.

PROJECTS

Integral Web Solution – Full Stack Production Website

GitHub: https://github.com/Sohamayer/integral-web-solution

- Built full-stack company website with React frontend and Node.js backend with Nodemailer-based email workflow.
- Deployed on Contabo VPS with Reverse Proxy, SSL, PM2 process management, and SEO optimization.

Shreeji Sales Corporation – SIMPOVENT® B2B Web Platform

GitHub: https://github.com/Sohamayer/shreeji-wind-ventilator

- Developed an enterprise-grade B2B platform using **Next.js, React, Express.js, and Nodemailer**, featuring product catalog pages, interactive CFM calculator, lead generation, and admin CMS.
- Implemented advanced **Technical SEO** including dynamic metadata, canonical URLs, XML sitemap, JSON-LD Schema, 50+ legacy 301 redirects, and keyword-targeted product pages for regional search visibility.

PixelVault – Full Stack E-Commerce Platform

GitHub: https://github.com/Sohamayer/pixelvault-wallpaper-store

- Developed full-stack platform using Next.js and Node.js with Stripe integration.
- Implemented secure checkout system and responsive UI.

FitCart – Headless Shopify E-Commerce Store

GitHub: https://github.com/Sohamaeer/fitcart

Live Link: https://fitcart-five.vercel.app

- Developed a headless fitness e-commerce platform using **Next.js, React, Shopify Storefront API, and GraphQL**, with live product collections, cart management, GST-aware pricing, and Shopify checkout.
- Implemented secure **Shopify Customer Account API** authentication using OAuth 2.0 and PKCE, customer accounts, saved addresses, and server-side API integration; deployed the application on Vercel.

Kavya Fragrances – AI Powered Website

GitHub: https://github.com/Sohamayer/kavya-fragrances

- Integrated AI recommendation system using Groq Llama 3.1.
- Implemented SEO optimization and backend email system.
